EDUCATION

Saveetha University
B.E in Computer Science
CGPA: 9.0

Chennai, Tamilnadu
Expected Graduation, May 2028

PROFILE SUMMARY

Targeting **Full stack Developer** roles with an organization of high repute with a scope of improving knowledge and further career growth.

- MERN stack (**MongoDB, Express.js, React, Node.js**) with a strong background in building scalable web applications
- Demonstrated ability to manage and deliver projects **efficiently**, from initial planning and design to final deployment and maintenance.
- Committed to **staying updated** with the **latest industry** trends and technologies, continuously enhancing skills to provide innovative solutions

PROJECTS

AI powered real time Desktop Assistant:

Nov 2025--Current

Tools: Python, SpeechRecognition Library, PyAudio, pyttsx3, DuckDuckGo search, web browser module, telegram bot

Responsibilities:

- Developed an AI-powered desktop assistant using Python that supports both voice and text-based commands.
- Implemented real-time web information retrieval and intent-based command processing for answering queries and performing tasks.
- Built desktop automation features to open applications, control system functions, and play media using natural language commands.
- Integrated PDF report generation and Telegram bot notifications to store and share assistant interaction results.

Blog Application with Authentication

June 2025

Tools: React, Appwrite, Redux

A full-featured blog application enabling users to register, authenticate, and manage their blog posts seamlessly.

Responsibilities:

- Developed the front-end using React, creating a responsive and intuitive user interface.
- Implemented user authentication and authorization using Appwrite, ensuring secure access to the application.
- Managed the backend entirely with App write, handling data storage, retrieval, and user management efficiently.
- Utilized Redux for state management to ensure consistent and predictable application state.

Currency Converter

June 2023

– July 2023

Tools: React, API Integration

A sleek and intuitive web application allowing users to easily convert amounts between different currencies, leveraging real-time exchange rates.

Responsibilities:

- Developed the front-end using React, ensuring a responsive design that works seamlessly across desktops, tablets, and mobile devices.
- Implemented real-time exchange rate fetching using an external API for accurate currency conversions.
- Added swap functionality to quickly interchange source and target currencies.
- Supported multiple global currencies to cater to a diverse user base.

ACADEMIC ACHIEVEMENTS

- Earned a certification in Full Stack Development, demonstrating proficiency in MERN stack technologies and project management.
- Led the college graphics designing team, organizing and managing various design projects and events, enhancing the team's creative output and visibility.

SKILLS

Programming: Java, Python, JavaScript, HTML/CSS, SQL, Node.js, React.js, C++, C, Swift (iOS)

Tools: Android Studio, IntelliJ, PyCharm, Eclipse, AWS, Git, Bootstrap, Spring Boot, Agile
